

Dual Label UI Spec v1.0

Dual AICPM + LFV Label - UI & Print Layout (Phase I)

Status: Publish-ready specification (neutral, printable, embeddable)

Design principles

- Neutral monochrome (no green/red, no scores)
- 10-second read
- One claim at a time
- Labels, not judgments
- Uncertainty visible
- Versioned ruleset shown

Side panel layout

- Claim (verbatim)
- Source (URL or user-selected)
- Ruleset IDs
- AICPM section: content type, evidence type, time scope, lineage, transparency, incentives, AI involvement
- LFV section: claim type, constraint checks, scope risk, flags, falsifiability, final label
- Actions: Copy label, Export JSON, Print

Printable one-page label

- Header: claim (verbatim), source/date, ruleset IDs
- Left: AICPM fields
- Right: LFV checks + final label
- Footer: "Structure only. No intent/credibility/policy."

Micro-badges (optional)

- "STRUCTURE" and "LOGIC" badges that open the full label
- No color grading, no ranking

Accessibility

- WCAG-AA contrast
- keyboard navigation
- locale-ready strings

Data contract

- One exportable object containing: claim, source, ruleset versions, aicpm object, lfvl object

End of Dual Label Spec
